Welcome to Sarah Blodgett photography

When clients come to me for event photography, they are looking for an artistic style that is sensitive and creative. I use my artistic background in combination with my commercial experience to capture the beauty and fun of your occasion. Working with an assistant we shoot digitally in high resolution. While my emphasis is on the candid shot, I also create formal images that are natural and beautiful. We work unobtrusively but thoroughly in order to create a photographic story, and lasting images for you to savor. Please feel free to look through our packages to see what would fit into your budget.

Wishing you all the best with your wedding day plans!
